● LOW EARTH ORBIT

# Hughes, OneWeb ink pact for satellite services in US, India

PRESS TRUST OF INDIA  
New Delhi, September 10

HUGHES NETWORK SYSTEMS and OneWeb have announced agreements for Low Earth Orbit satellite services in the US and India.

Hughes Network Systems, which focuses on satellite and multi-transport technologies and networks, and OneWeb, the Low Earth Orbit (LEO) satellite communications company backed by Bharti, said that they have signed a distribution agreement in the US, for enterprise services.

"In India, the parties have entered into an MOU (Memorandum of Understanding) for a strategic agreement to distribute services to large enterprises, small and medium businesses, government, telcos

Bharti Enterprises chairman Sunil Mittal

and ISPs (Internet Service Providers) in the rural and remote parts of the country," OneWeb said in a statement.

Services will be offered by Hughes Network Systems, LLC, and Hughes Communications India, respectively.

Hughes and OneWeb would work together to broaden distribution globally, with Hughes offering Wi-Fi hotspots, according to the statement.

Hughes, through its parent company EchoStar, is an investor in OneWeb, a company that is building its initial constellation of 648 LEO satellites.

Hughes and Bharti-backed OneWeb would work together to broaden distribution globally, with Hughes offering OneWeb's low-latency, high-speed connectivity

latency, high-speed connectivity for markets such as enterprise, government, commercial aviation and maritime, cellular backhaul, and community Wi-Fi hotspots, according to the statement.

Hughes, through its parent company EchoStar, is an investor in OneWeb, a company that is building its initial constellation of 648 LEO satellites.

latency, high-speed connectivity for markets such as enterprise, government, commercial aviation and maritime, cellular backhaul, and community Wi-Fi hotspots, according to the statement.

Hughes, through its parent company EchoStar, is an investor in OneWeb, a company that is building its initial constellation of 648 LEO satellites.

The services will begin this year to the Arctic region including Alaska, Canada, and the UK.

OneWeb had recently said it is on track to offer services in India from May 2022, and that its offering will benefit not just Airtel but the other telecom operators as well, by pushing broadband into underserved and remotest areas of the country.

By late 2022, OneWeb will be offering its high-speed, low latency connectivity services, globally.

Service testing on the satellites already in orbit is underway, using gateways that Hughes is building for the network. Results are positive, including seamless satellite and broadband connectivity, high speeds and low latency," the statement said.

tarities that exist between the US and India — advanced US technologies and rapidly growing India's energy market, for a win-win situation through a cleaner energy route with low carbon pathways," it said.

After the revamp, there would be considerable emphasis on upscaling cooperation under the renewable energy pillar, working on several projects and system-friendly practices in India's renewable energy sector.

"The US secretary lauded India's renewable energy target of 450 GW by 2030, and offered to closely collaborate in realization of this target by India," the statement said.

"Both sides will strengthen the electric grid in India to support large-scale integration of renewables, including through smart grids, energy storage, flexible resources, and distributed energy resources, and ensure reliable and resilient grid operations, as well as promoting energy efficiency and conservation measures," it added.

# India, US agree to collaborate on emerging fuels under SCEP

PRESS TRUST OF INDIA  
New Delhi, September 10

INDIA AND THE US have agreed to expand their energy partnership by adding emerging fuels to the list of areas of cooperation that previously included power and energy efficiency, oil and gas, renewable energy and sustainable growth, an official statement said.

This followed a ministerial meeting of the US-India Strategic Clean Energy Partnership (SCEP) on Thursday evening.

"Minister of petroleum and natural gas Hardeep Singh Puri co-chaired a virtual ministerial meeting with US secretary of energy Jennifer Granholm to launch the revamped US-India Strategic Clean Energy Partnership," a statement from the oil ministry said.

The SCEP was launched in accordance with the US-India Climate and Clean Energy Agenda 2030 Partnership announced by Prime Minister Narendra Modi and President Joe Biden at the Leaders' Summit on Climate last April.

"The two sides announced the addition of the Pillar on Emerging Fuels, which signals joint resolve to promote clean energy fuels," it said. It said "a

"The two sides announced the addition of a fifth Pillar on Emerging Fuels (to the SCEP), which signals joint resolve to promote clean energy fuels," the oil ministry said

new India-US Task Force on Bio-fuels was also announced to build on the scope of work on cooperation in biofuels sector."

With this, the SCEP inter-governmental engagement now spreads across five pillars of cooperation — Power and Energy Efficiency, Responsible Oil and Gas, Renewable Energy, Sustainable Growth and Emerging Fuels.

The statement said Puri and Granholm reviewed the progress, major accomplishments, and prioritised areas for cooperation under the various pillars. "The meeting also reviewed the progress on the India-US Civil Nuclear Energy cooperation," it said without providing any details.

"(Minister Puri emphasised that the renewed partnership will intensify their efforts from both sides to take advantage of the complemen-

mentary and rapidly growing India's energy market, for a win-win situation through a cleaner energy route with low carbon pathways," it said.

After the revamp, there would be considerable emphasis on upscaling cooperation under the renewable energy pillar, working on several projects and system-friendly practices in India's renewable energy sector.

"The US secretary lauded India's renewable energy target of 450 GW by 2030, and offered to closely collaborate in realization of this target by India," the statement said.

"Both sides will strengthen the electric grid in India to support large-scale integration of renewables, including through smart grids, energy storage, flexible resources, and distributed energy resources, and ensure reliable and resilient grid operations, as well as promoting energy efficiency and conservation measures," it added.

# Iso: Orbiter payloads of Chandrayaan-2 discovery-class findings

PRESS TRUST OF INDIA  
Bangalore, September 10

THE OBSERVATIONS of the Chandrayaan-2 orbiter payload have yielded discovery-class findings, according to the Indian Space Research Organisation (ISRO).

There are eight scientific payloads hosted on the orbiter.

Earlier this week, ISRO opened up its scientific discussions on Lunar Science to "the people of the country, to engage the Indian academia, institutes, students, and people from all disciplines and walks of life," in the form of a two-day Lunar Science Workshop & Release of Chandrayaan-2's Data.

The virtual workshop commemorated the completion of two years of the Chandrayaan-2 orbiter in the lunar orbit. Iso chairman and secretary in the department of space K Sivan inaugurated the workshop and released the documents on Chandrayaan-2 science results and data products. "The lunar workshop delivered the big news of bunch of discovery-class of findings by Chandrayaan-2," the agency said.

# ● INTERVIEW: SURINDER K GUPTA, chairman & MD, MSTC

## 'Agri commodities have taken the No. 1 spot in respect of transaction volume'

From a trading company MSTC, under the ministry of steel, has transformed itself into an e-commerce company over the years. The Centre expects it to play a major role in the government's drive to monetise assets. While the company has already created a deep footprint in e-auctioning agri commodities, it is moving ahead to recycle end-of-life vehicles in an e-cyberdium manner. Chairman and managing director, MSTC, Surinder Kumar Gupta speaks to Indranil Roychowdhury about the company's current focus and its days ahead. Edited excerpts:

Chairman and managing director, MSTC, Surinder Kumar Gupta speaks to Indranil Roychowdhury about the company's current focus and its days ahead. Edited excerpts:

MSTC has a number of modules for e-auction. What are your current auctioning portfolios? MSTC's e-commerce platform has various bidding modules like Price Bid, Price-Quantity bid, e-Tender, Multiple Stage Bidding, SMRA Auction, Swiss Challenge, Multi Currency Bidding, e-Reverse Auction, and bidding platform for Export and Import and others.

We conduct auctions for majority of the PSUs, electricity companies, central & state government departments & many reputed private companies. Our differentiation in modules for e-auction and e-procurement has come through 19 years of experience in commerce.

Actioning of which commodity gives you the highest business at present? Agricultural commodities have taken the number one place in respect of transaction volume in the last financial year. In case of auctions conducted for long-term lease, for example spectrum auction, coal mines auction, mineral block auction, commercial space and others, we do not consider the total value for the entire lease period for our business transaction volume. Rather, we take value equivalent to one year's transaction value for reporting purpose, otherwise the same will be astronomically high.

What sort of support does MSTC provide to the farmers from its auction platform? What are the agri commodities that MSTC is auctioning? How much worth of agri commodities was auctioned last fiscal and in the first quarter of the current fiscal? We have developed e-RaKAM (e-Rashtriya Kisan Agri-Mandi) portal to bring together the farmers, civil supplies and buyers on a single platform to ease the selling and buying process of agri and horticulture products. This portal can connect the farmers from small

village to the biggest market. We have already developed a portal bhivik Kheti on behalf of the ministry of agriculture & farmers welfare for organic farming and giving wider market access to the organic farmers. India Post has been integrated as logistics partner. On the boarding of few more logistics partner is under process.

Bidding portal for Cotton Corporation of India has been developed for auctioning of cotton & cotton seeds.

MSTC has been roped in to sell assets of sick PSUs. How much worth of asset selling is in MSTC's radar? We have developed a bidding portal through which various CPSUs are doing their internal due diligence. We hope to start getting properties in current quarter itself. The government's push on monetisation of assets is bound to gain traction.

Will the new scrapage policy help the JV, Mahindra-MSTC Recycling Pvt Ltd? Please throw some light on the expansion trajectory of the JV? With the ministry of road transport and highways implementing the scrapping policy, there is likely to be improvement in the mode of selling of end-of-life vehicles (ELVs). There will be incentives for selling ELVs to authorized recyclers and disincentives for carrying and running very old vehicles. ELVs offered to authorized recyclers are very less as local scrap dealers pay more. They hardly follow environmental

standards and do not pay GST. Such players even recycle engines.

MSTC had made transactions worth ₹1.25 lakh crore last fiscal? How do you foresee the current fiscal? This fiscal our target for transaction is ₹1.5 lakh crore but the first quarter performance is quite encouraging. The first quarter transaction this fiscal was around ₹37,000 crore against ₹37,300 crore achieved in the first quarter last fiscal.

# Volume-led growth, cost control to help maintain decent margins, says Emami

PRESS TRUST OF INDIA  
New Delhi, September 10

HOME GROWN MAJOR Emami has said it intends to maintain decent margins in FY22 on the back of stringent cost control and volume led growth.

Currently, FMCG companies are facing inflationary pressure on raw material inputs and some of them have even increased the prices to maintain margins.

The Kolkata-based company would try to absorb input costs through higher opera-

FMCG companies are currently facing inflationary pressure on raw material inputs and some of them have even increased their prices to maintain margins

tional efficiency and judicious price increases, said the latest annual report of the company. "Going forward, the company intends to maintain decent margins on the back of

stringent cost control and volume-led growth. Increase in raw material costs could be absorbed through higher operational efficiency and judicious price increases," said Emami over the outlook for FY22.

In FY21, Emami's performance was impacted due to the pandemic-induced lockdown. "However, margins increased with a price-led growth due to stringent cost control and benign raw material prices," it added.

According to Emami, it enjoys one of the highest margins in India's FMCG companies, generating an attractive corpus for reinvestment.

"The company is debt-free despite having invested more than ₹2,600 crore in acquisitions over 12 years," it added.

In FY21, Emami, which owns some power brands such as Navratna, Boro Fines, Kesh King, Men's Fairness Cream, had a revenue of ₹2,881 crore, up 6.5% from a year-ago growth due to stringent cost control and benign raw material prices," it added.

That was the ultimate holding company of such erstwhile public sector company immediately after completion of the strategic divestment, ceases to hold, directly or through its subsidiary or subsidiaries, 51% of the voting power of the erstwhile public sector company," it said.

Necessary legislative amendments for the above decision shall be proposed in due course of time, CBDT said.

# Govt allows disinvested public sector companies to set off previous losses

FE BUREAU  
New Delhi, September 10

AHEAD OF THE strategic disinvestment of Air India and fuel retailer-cum-refiner BPLC, the government on Friday said losses incurred by disinvested public sector undertakings (PSUs) in previous years can be carried forward and set off.

"In order to facilitate the strategic disinvestment, it has been decided that Section 79 of

"...loss incurred in previous year prior to, and including, the previous year of strategic divestment shall be carried forward and set off by the erstwhile public sector company," CBDT said

the Income-tax Act, 1961, shall not apply to an erstwhile public

sector company which has become so as a result of strategic divestment," the Central Board of Direct Taxes (CBDT) said. "Accordingly, loss incurred in any previous year prior to, and including, the previous year of strategic divestment shall be carried forward and set off by the erstwhile public sector company."

"The above relaxation will cease to apply from the previous year which the company,
